INSTALLATION

The use of forklifts is recommended for the proper installation of the Forum Planter.

PRODUCT INFORMATION

The Forum Extremus is a prefabricated architectural concrete element by Opticretos with dimensions of R35.43", H: 27.55" and a weight of 872.86lb, which functions as a central element and as a container for flora. It is part of a system of modulation between the elements of the collection and functions in its individual space.

MANUFACTURING

Our benches are manufactured using special molds. The concrete is processed using automated machinery, ensuring the highest quality in materials. All our products are manufactured in a plant under controlled conditions.

COMPONENTS

We use materials such as cementitious marble aggregates, anti-fungal additives, alkali-resistant polypropylene fibers, integral waterproofing additives, and hydrophobic sealant.

ADVANTAGES

Stain-resistant

Durability

Easy installation

Environmentally sustainable

Its maintenance is minimal, and the color does not change or degrade over time since natural materials are used.

CODES AND REGULATIONS

All our concrete products comply with current regulations. Some of these codes include: ACI 318, PCI (Precast Concrete Institute), IMCYC (Mexican Institute of Cement and Concrete), and the Building Regulations of the Federal District.
